

CUBRA

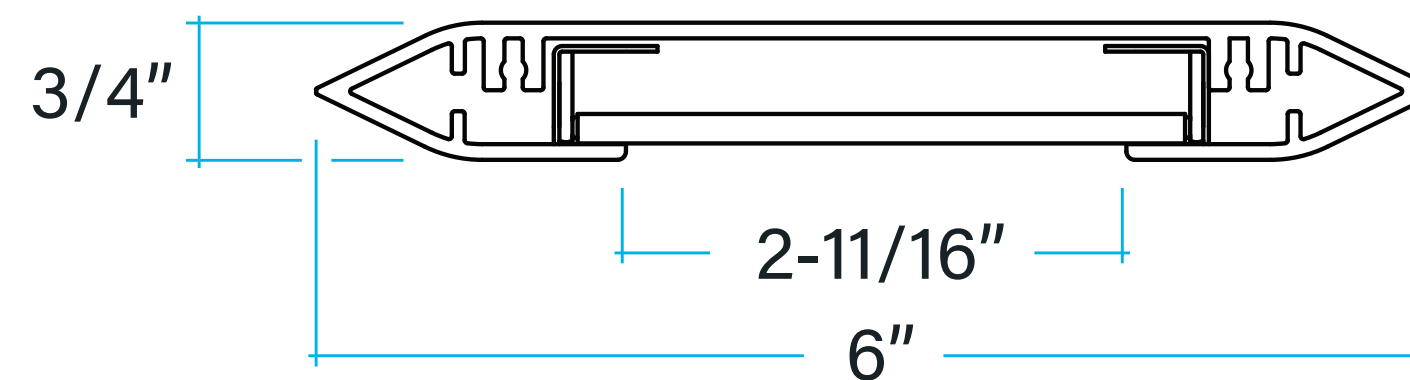

CUBRA DISAPPEARS LIKE MAGIC

Slim, clean and modern, this fixture delivers the evanescent style you want with the performance you need.

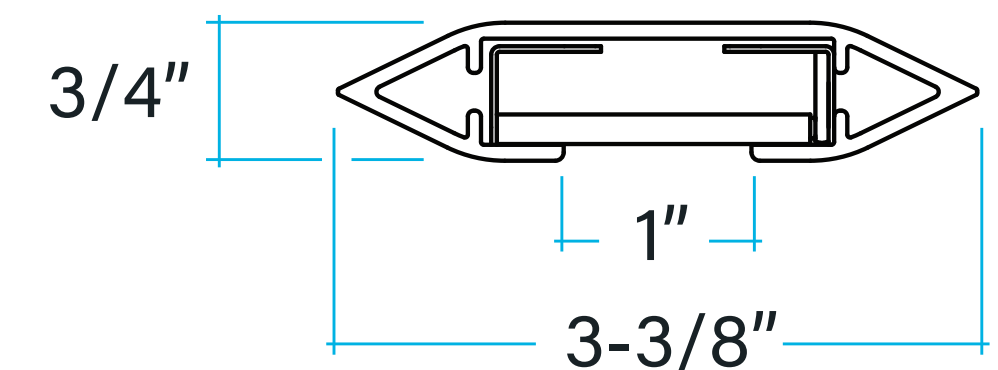

CUBRA's compact optical system allows you to create shallower profile designs compared with traditional lines of light. With an ultra-slim 3/4" profile, Cubra vanishes into your space to showcase your design.

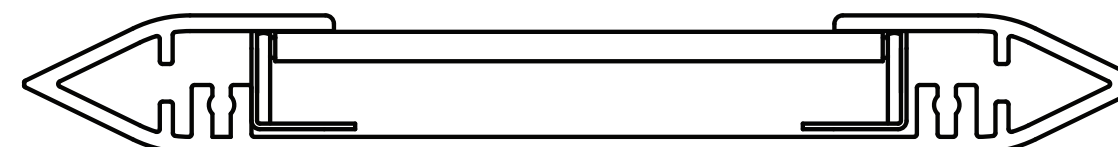

Cubra 3 Direct (CU3D)

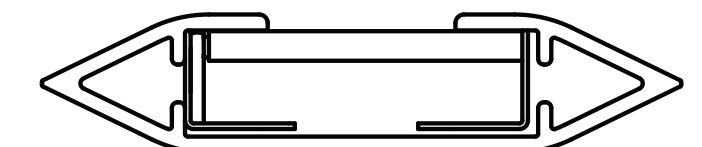

Cubra 1 Direct (CU1D)

Cubra 3 Indirect (CU3I)

Cubra 1 Indirect (CU1I)

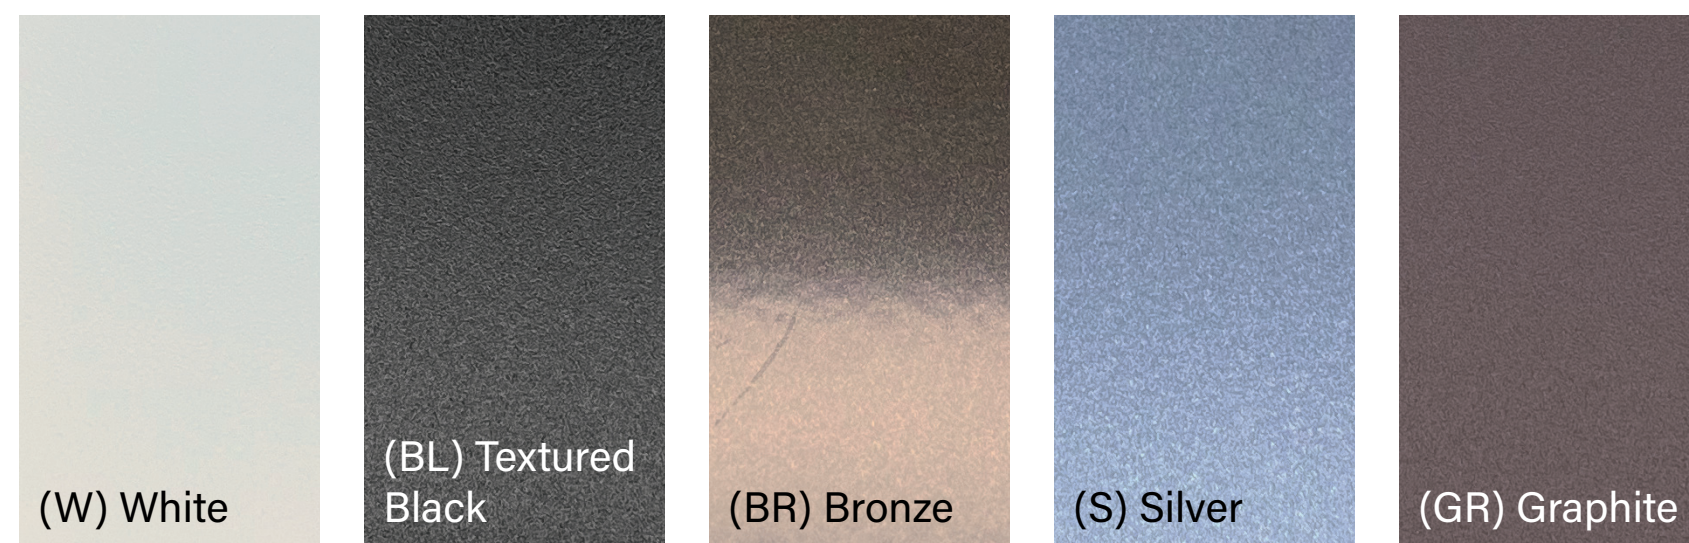

WHEN THE SMALLEST DETAILS MATTER

A 3/4" fixture height is remarkably thin, but designers care about the details and so do we.

3" Aperture 6" Fixture: Choose 4 stylish end caps to add the final touches to your vision and artistry: Tapered, Slotted, Inset, and Flat

1" Aperture 3" Fixture: Due to its svelte size, Tapered is your exclusive profile.

5 Standard finish options:

*Colors for representational purpose only. For accurate color please contact the factory for color samples.

Tapered Endcap

Slotted Endcap

Inset Endcap

Flat Endcap

EVEN THE JOINTS DISAPPEAR

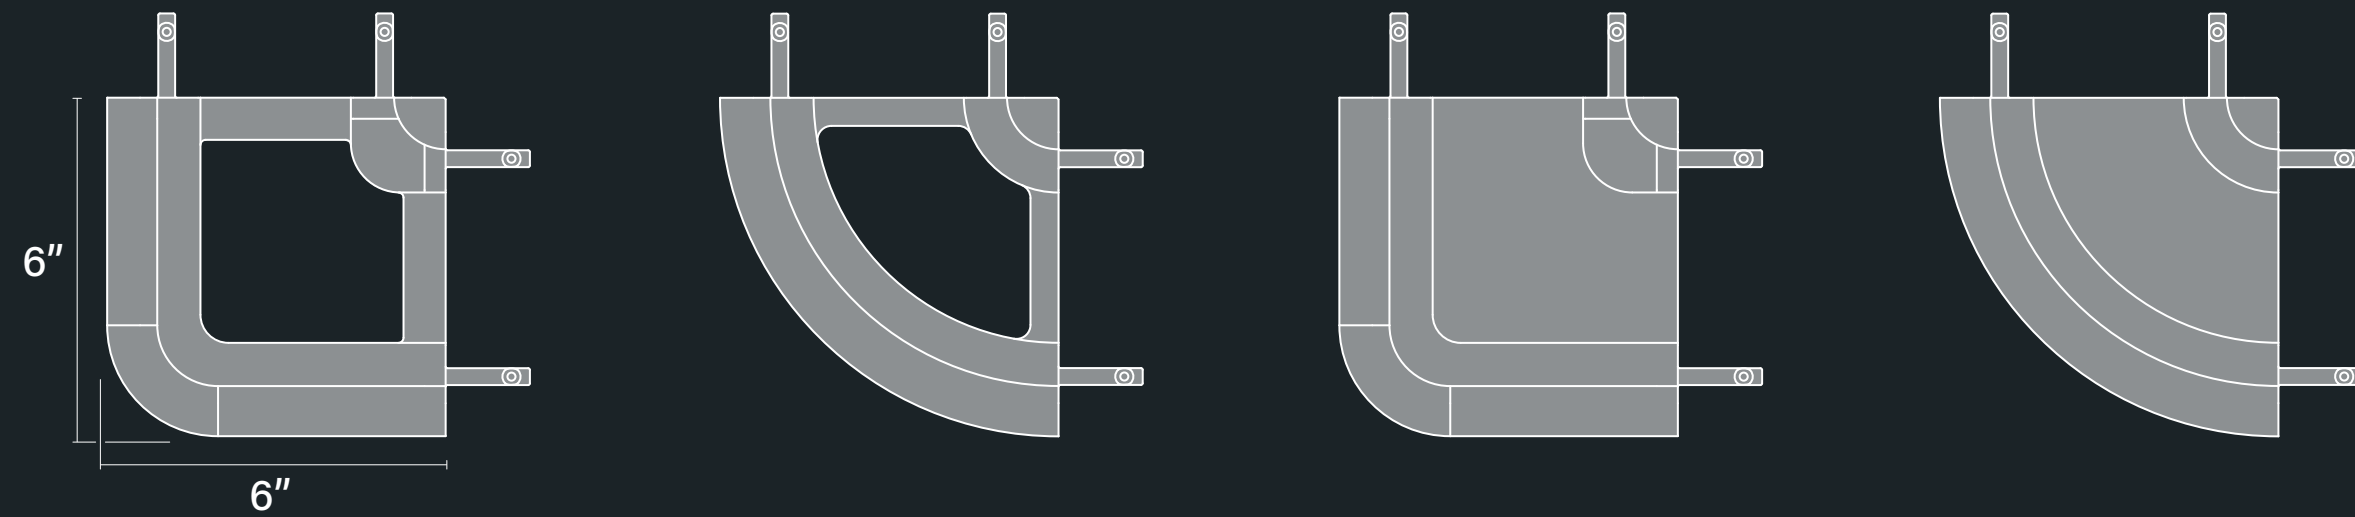

Does your design require a uniform, balanced plane, but with both direct and indirect lines of light?

CUBRA's alternating joint allows designers to create direct and indirect lines and patterns while maintaining a perfectly level horizon.

At a mere **3/16"**, the joiners practically vanish into the lines of light.

AHEAD OF THE CURVE

Linear lights will always be king for adding dimension to your space.

CUBRA's 90° non-illuminated connector adds architectural interest while creating rhythm and dimension when linking spaces together.

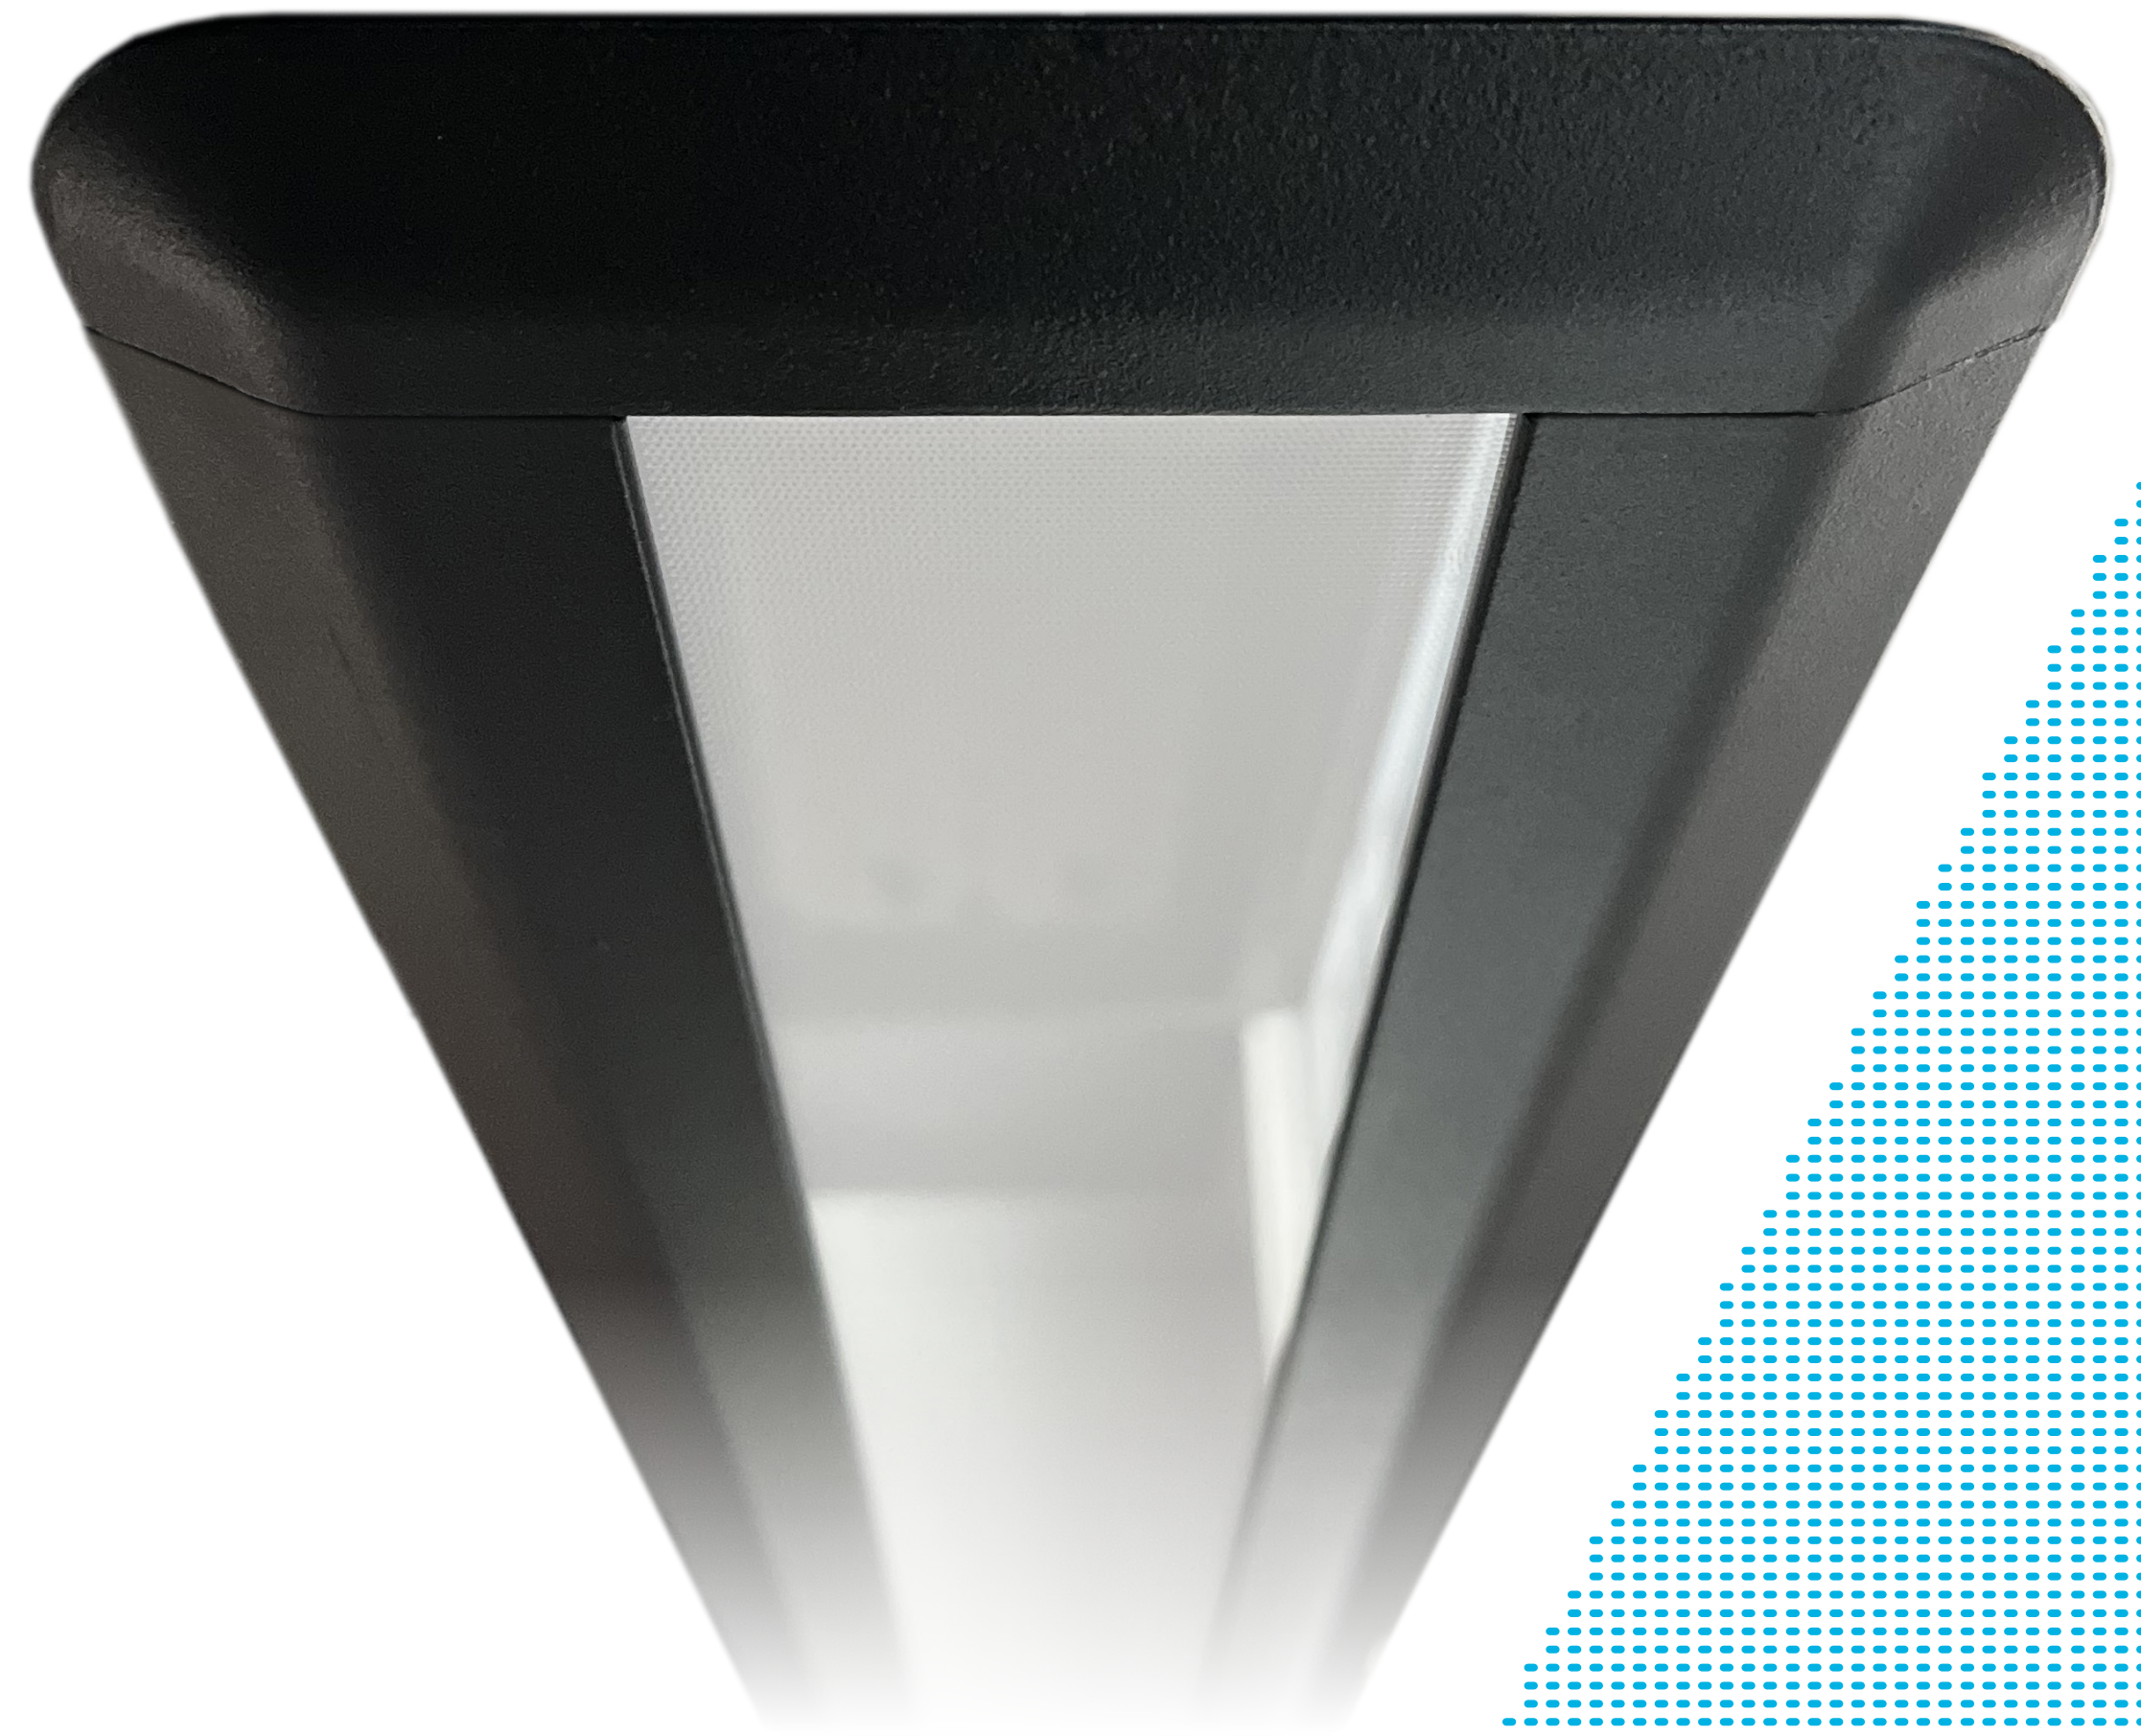

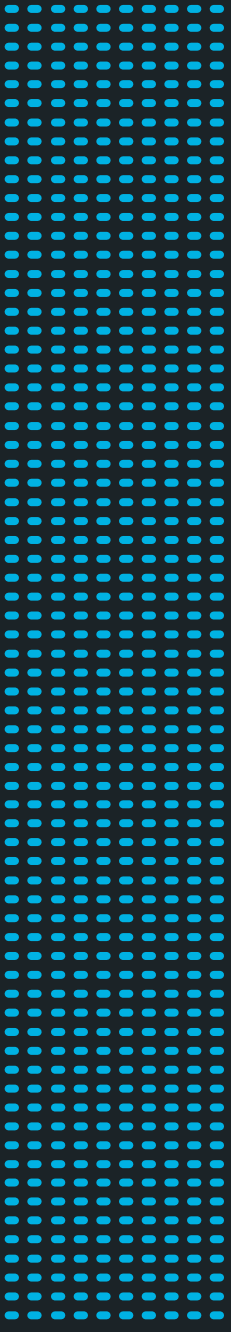

ETCHED PERFECTION

CUBRA's laser-etched light guides are not only functional, they deliver a highly stylized design element.

Whether Batwing or Lambertian, your fixtures will flaunt sophisticated etched patterns that harmonize perfectly from one space to the next.

SMALL BUT MIGHTY

3" Aperture: Lambertian

- Up To **128 LPW**
- Up To **14' On Center**

3" Aperture: Batwing

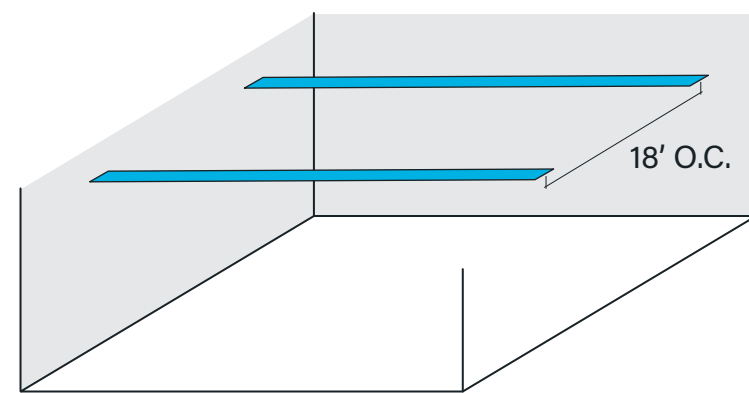

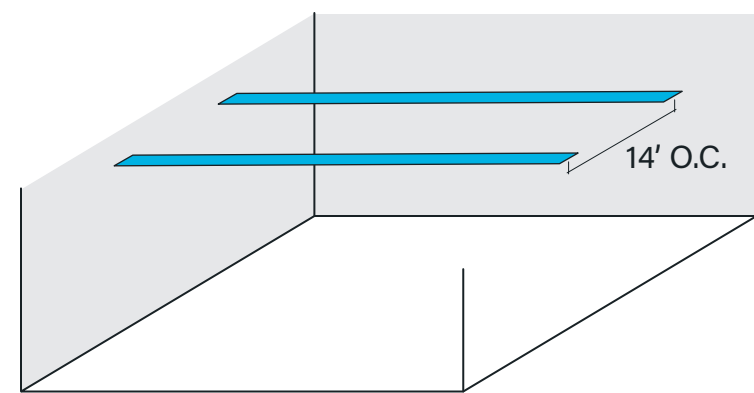

- Up To **111 LPW**
- Up To **18' On Center**

1" Aperture: Lambertian

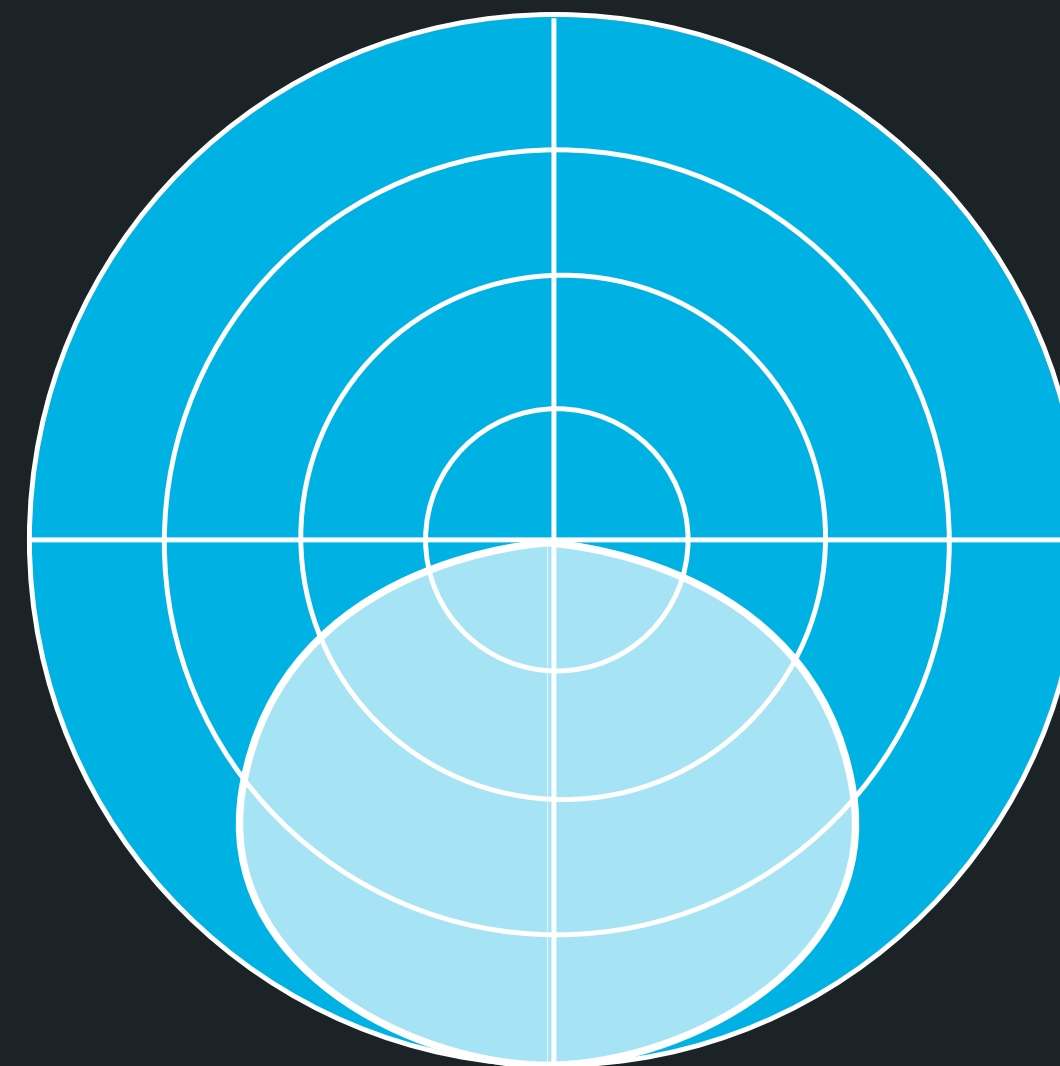

- Up To **120 LPW**
- Up To **14' On Center**

1" Aperture: Batwing

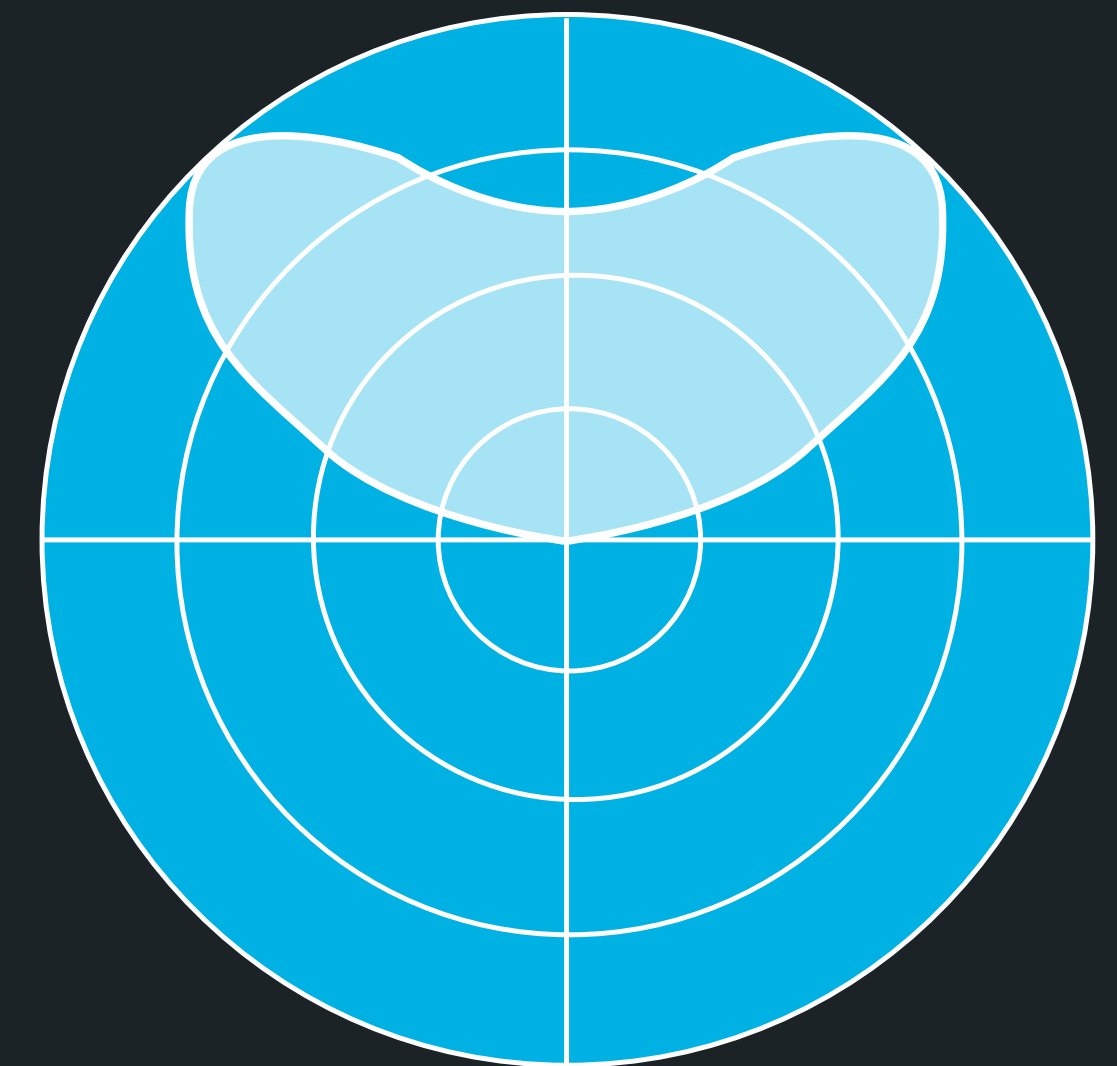

- Up To **107 LPW**
- Up To **18' On Center**

Direct Lambertian

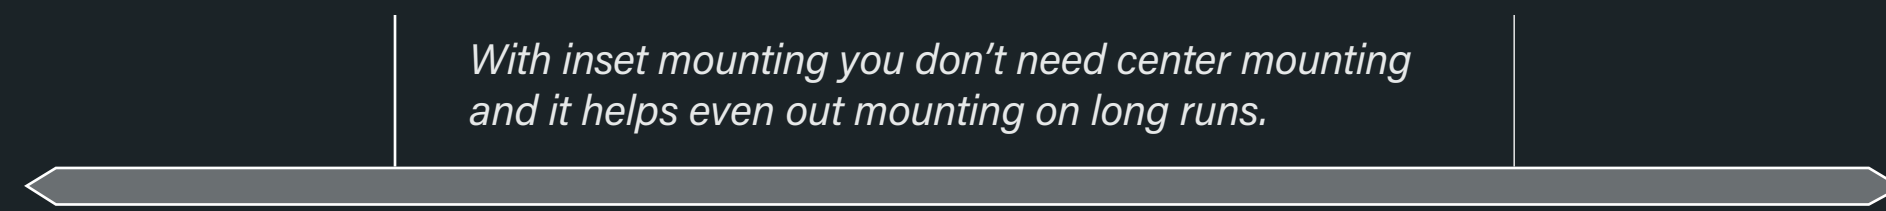

Indirect Batwing

SCALED TO BE SUBTLE

Thin, minimal profile conductive suspension cables combines your suspension mount + power feed for a clean, decluttered ceiling. Mounting points inset from the ends eliminate the need for center wires.

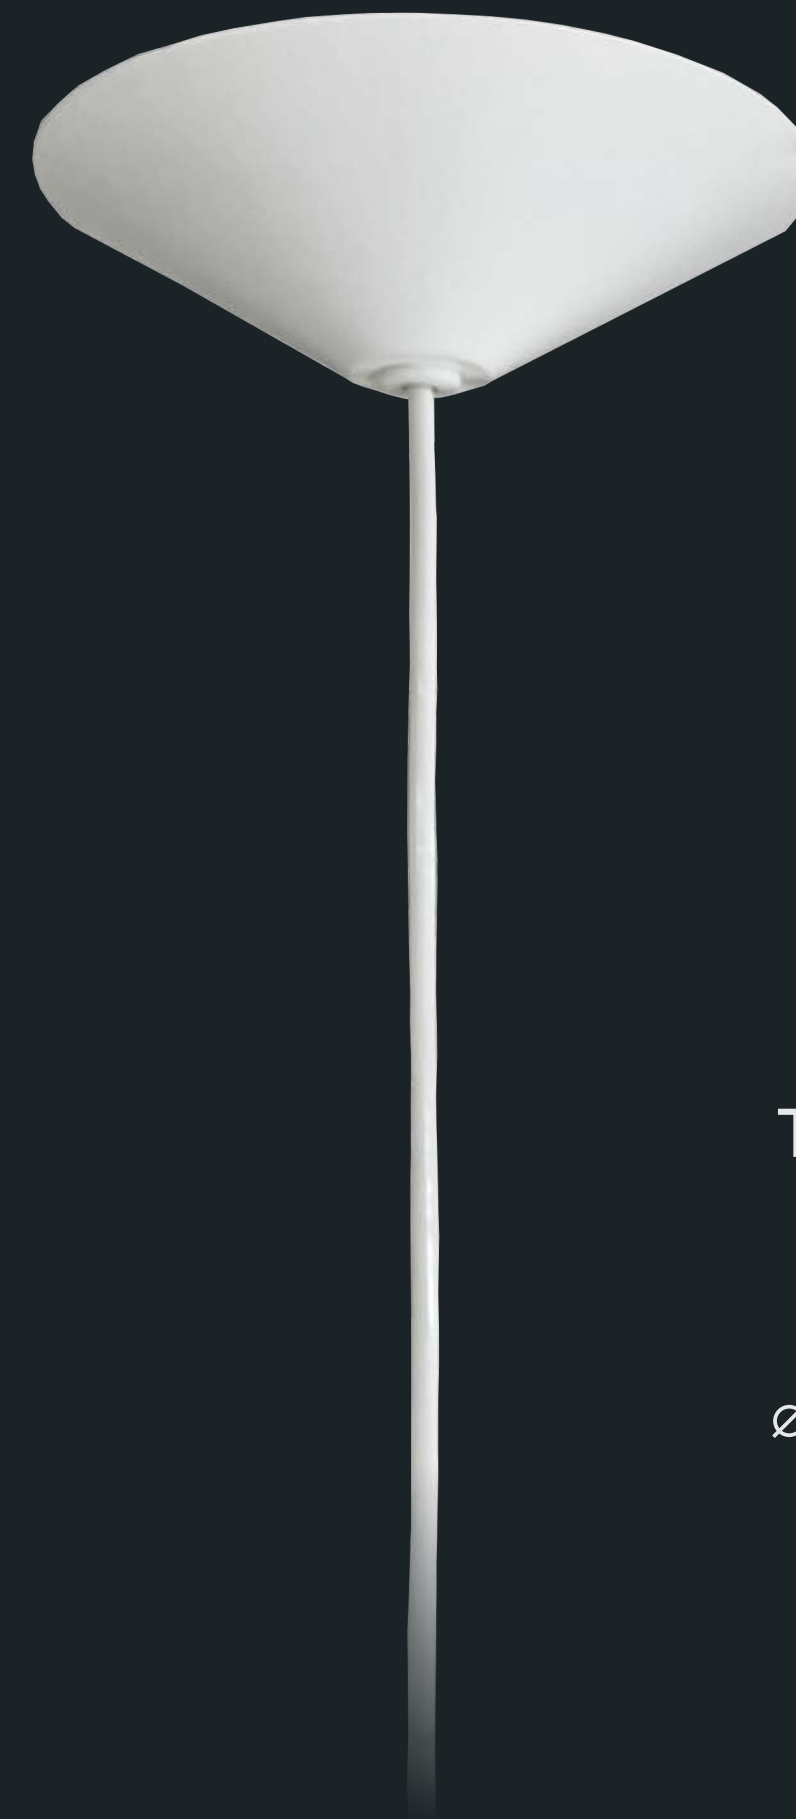

Lightweight: Your contractors will be delighted, a single 8' fixture weighs as little as 12lbs.

Defined lengths: 1' increments from 1'-8' to finish your spaces with precision

Modern Power: Choose from Conductive Aircraft Cable (CAC) or Power over Aircraft Cable (PAC)

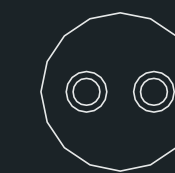

Surface Mount: Wall and Ceiling

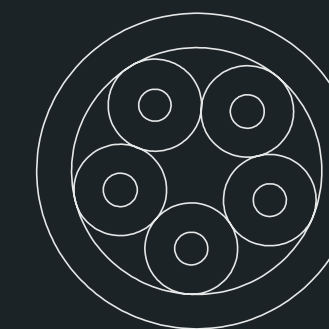

Top View

Side View

CAC = 3/16"
Conductive Aircraft Cable (CAC):
Two conductive cables and suspension.

SJT = 3/8"
Standard power cable (SJT):
Five conductive cables and no suspension.
